

KTEC

From installation
to maintenance –
your partner for seamless
operations.

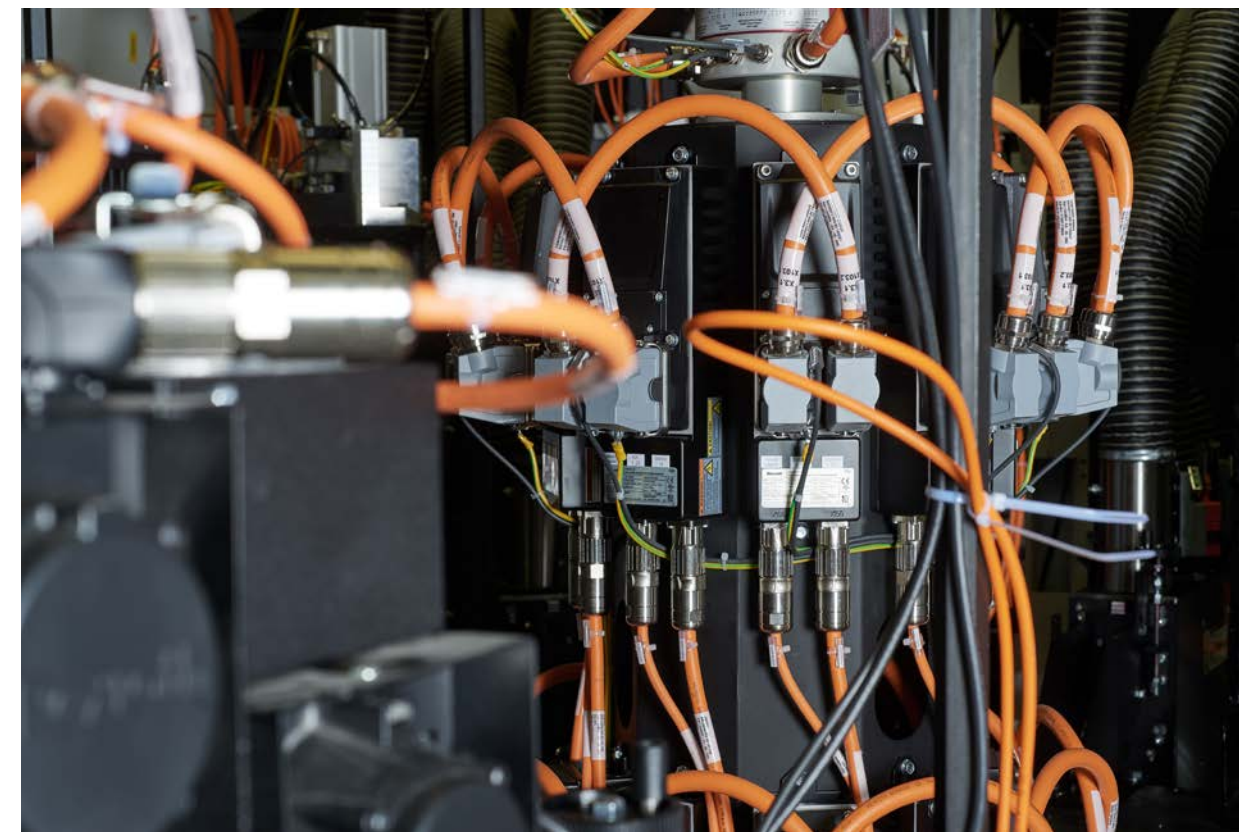

We are a dedicated team of specialists with production experience on Koenig & Bauer Kammann machines since 1990 and a desire to share our know how with clients world wide.

Our focus is to enable new clients to have an immediate production start and for our existing clients to optimize quality and productivity.

**We are
certified partner of:**

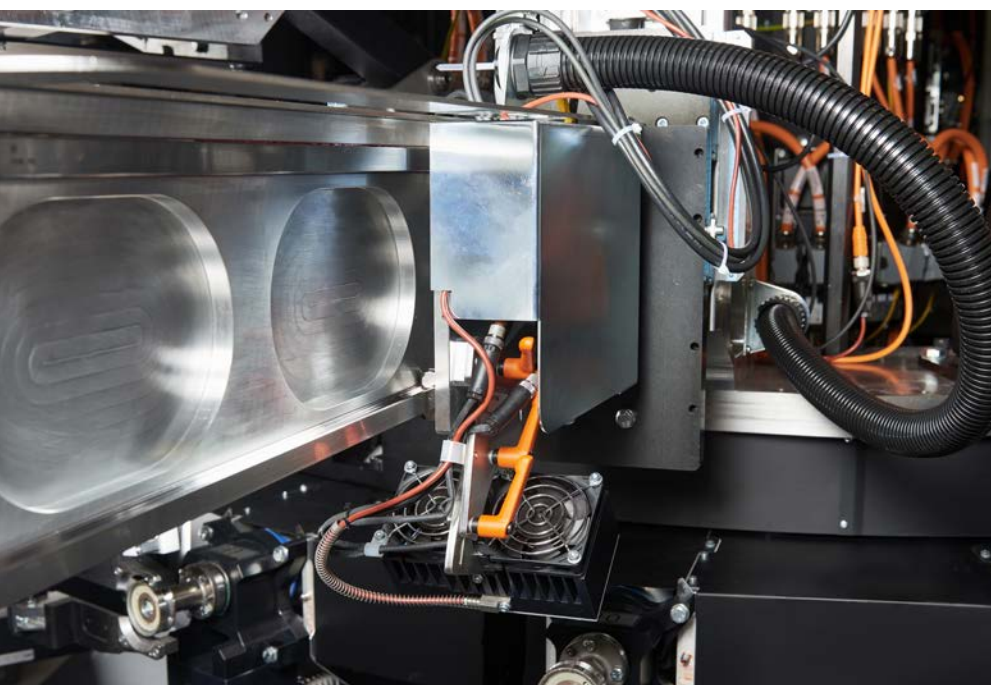

KOENIG & BAUER

GLASSCOAT
colour coating glass worldwide

pennekamp ▶

Schildmann
GmbH **PHD**
Production Handling Development

Technoshell
Automations Pvt. Ltd.

Our main objective is to sell, service and support Koenig & Bauer Kammann machines.

All other activities support this main objective.

We offer consulting services for the design and construction of complete decorating departments. Our production support is available worldwide on both short- and long-term bases. Additionally, we provide training for customer personnel on all machines and processes. Complementing these services, we also design print images, develop brands, and prepare samples.

**The idea
is the limit**

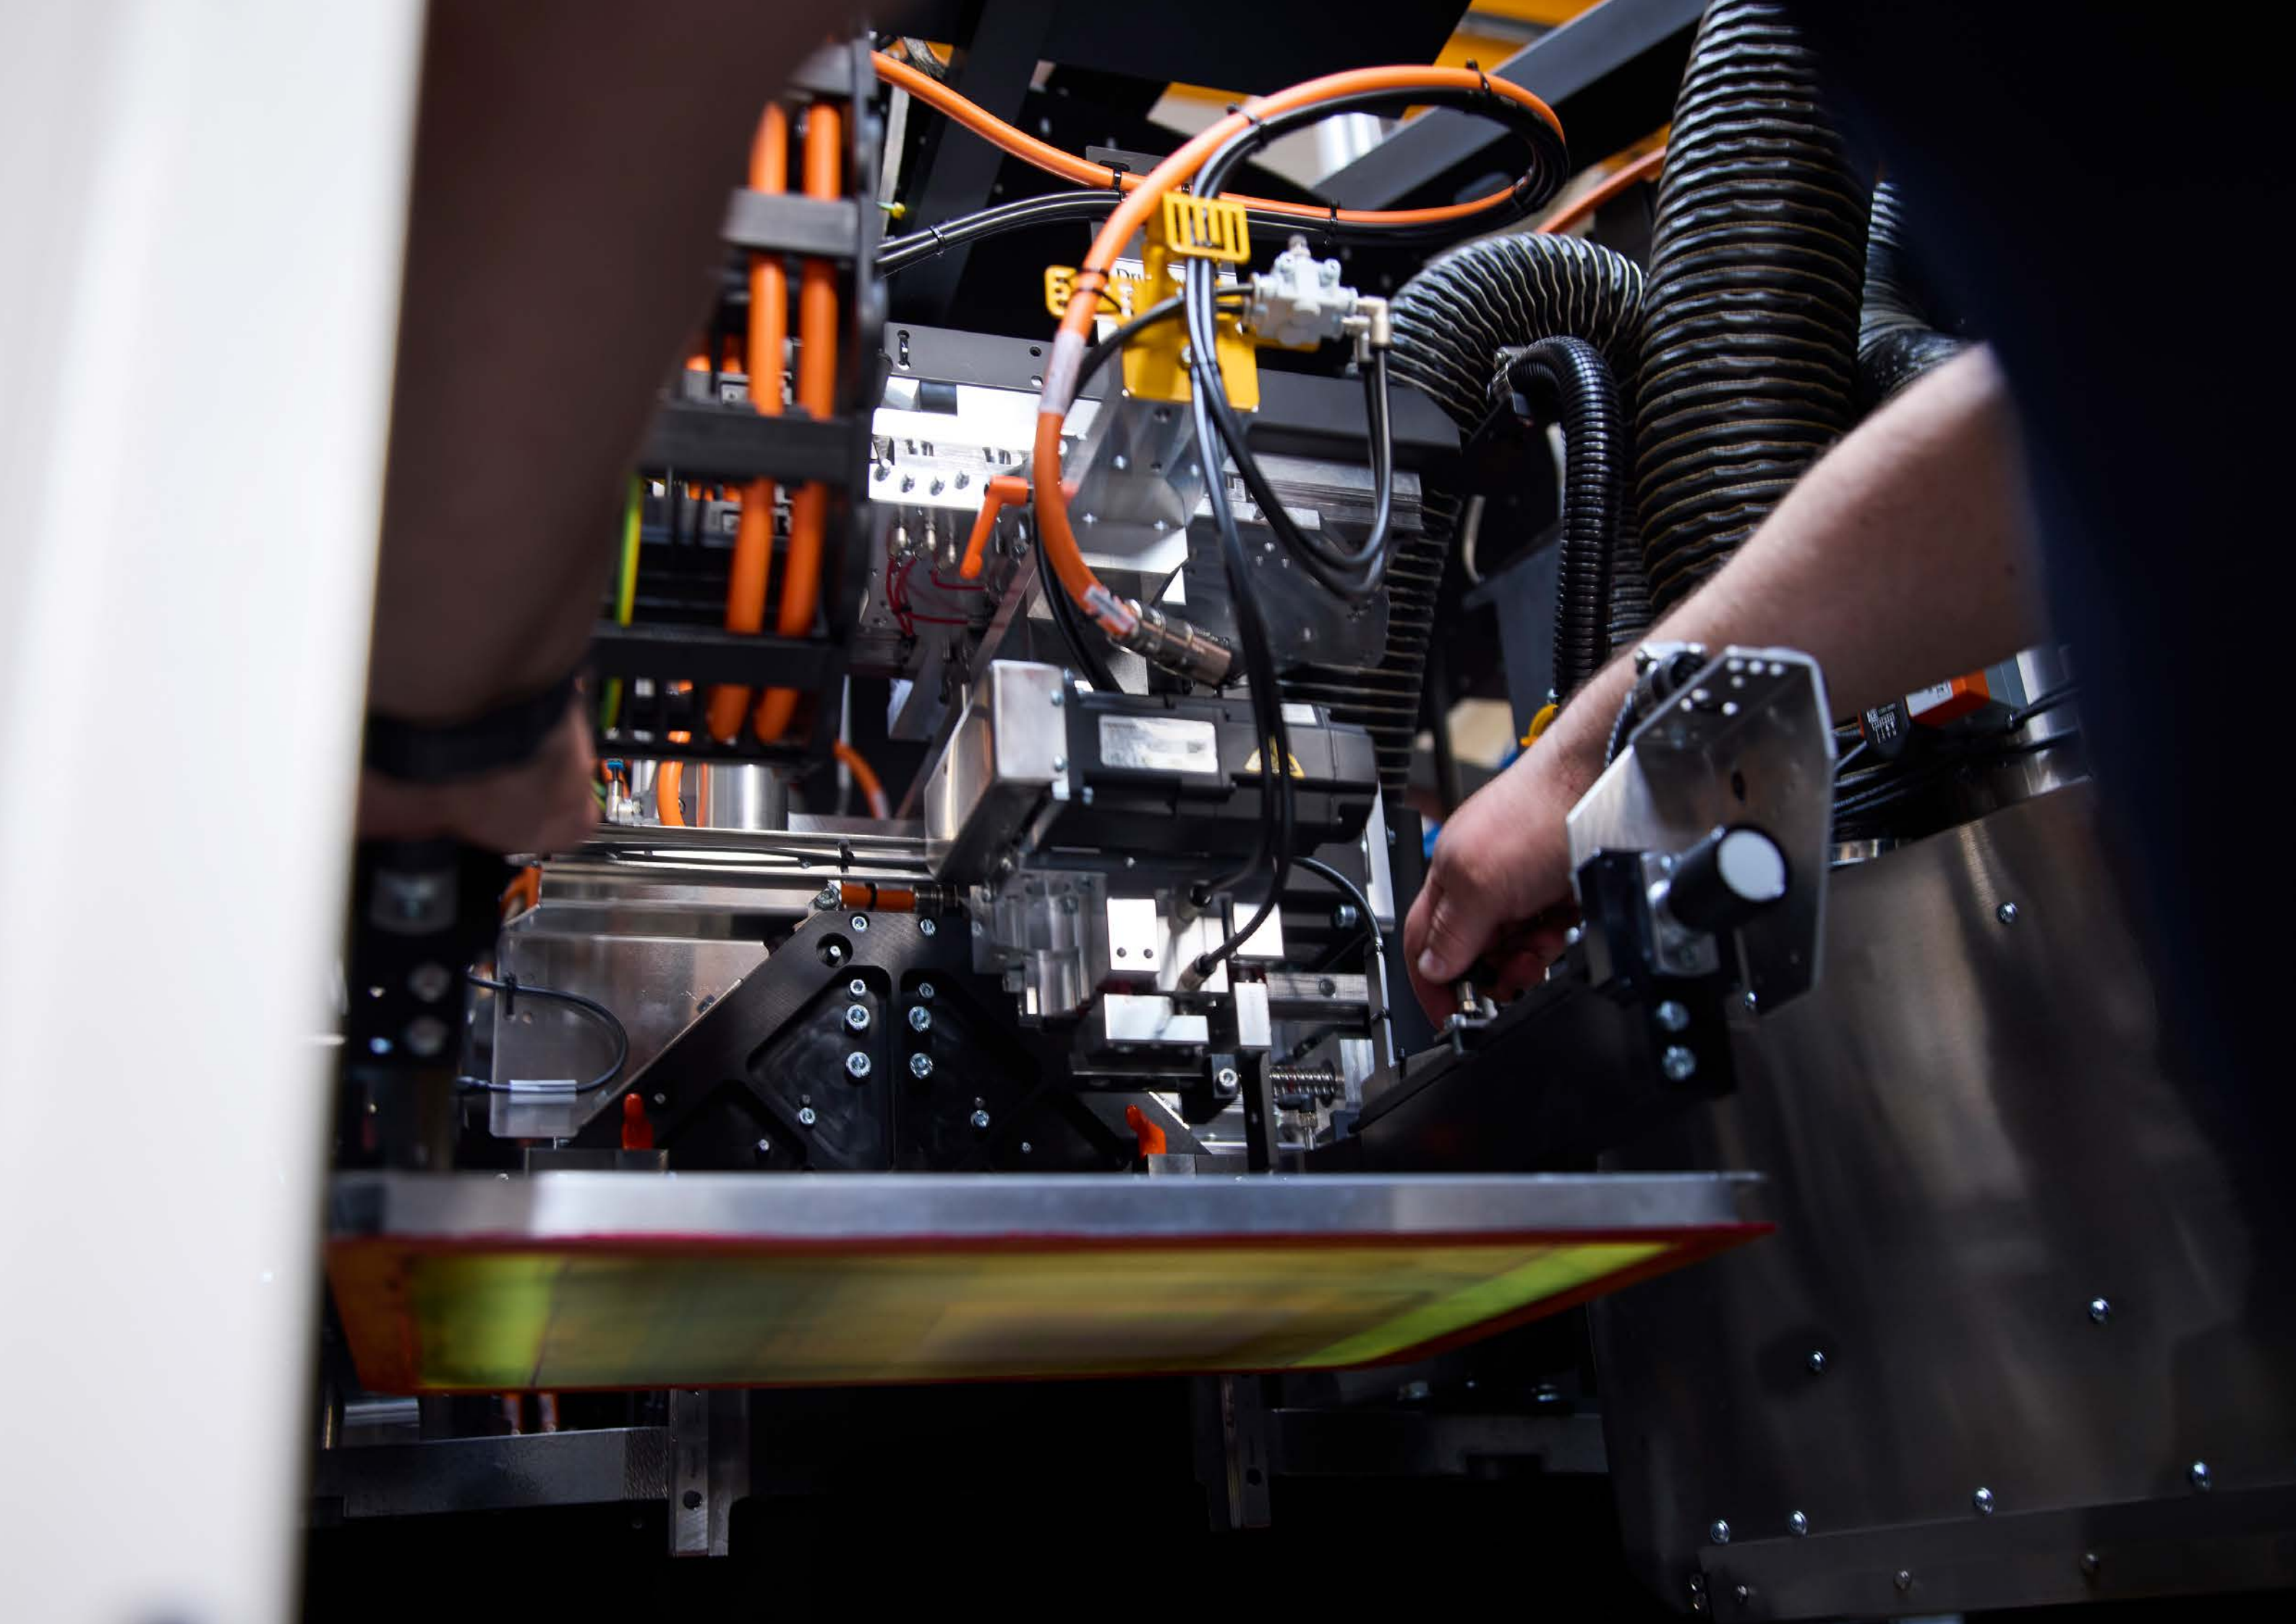

Our experts will share their know-how and experience with you.

Our range of products includes the line of fully automatic screen and digital printing machines from Koenig & Bauer Kammann, specifically designed for the decoration of glass packaging, such as beverage bottles, cosmetic flacons and table ware, as well as plastic packaging (blow and injection moulded containers).

**We are
experts and
we bring you
knowlegde.**

Boosting Your Production Worldwide

Mexico
Costa Rica**

Service & Support

We are installing and servicing all machines and processes in collaboration with our partners.

Our service begins with installation and machine commissioning, ensuring a smooth start to production. We offer production support, on-site assistance by a K-TEC technician, and online troubleshooting to keep operations running seamlessly. Regular preventive maintenance and periodic machine reviews further guarantee optimal performance.

Consulting & Training

A large range of consulting services are available:

Planning the layout of your production facility and designing containers and articles. We also specialize in artwork and brand development. We offer expert consultations on all relevant processes-ranging from screen printing (UV, organic, ceramic) and digital printing (Ink Jet) to spray coating, metallization, hot stamping, pad printing, and more. Additionally, we provide hands-on and classroom training, ensuring a smooth process implementation into production.

K-TEC Coating

**consulting
solution oriented
optimization**

Together with our customers we identify precisely the materials that meet their quality and cost targets. Sampling and testing beforehand minimizes the risk during production and ensures customers satisfaction.

**Inks
paints
consumables**

K-TEC Coating offers you comprehensive assistance – from the selection of optimal materials to pre-production testing and sampling for both: coating materials and screen printing inks. We analyze your product requirements and identify from various suppliers those materials, which best meet your quality and price expectations. The goal is to have the best possible match between your production machine, your articles and the paint or ink.

Custom colors and special formulations are available upon request.

Our expertise for your best results.

We offer a complete inhouse solution.
